

Quality Program Review Measures & Cohorts

Technical Skill Attainment

Technical Skill Attainment measures the percentage of CTE Concentrators in the reporting year who participated in and received a cumulative score of proficient or higher on the technical assessments aligned to their pathway. If less than 90% of the concentrators take a required technical assessment (participate), the pathway receives a demotion for the Technical Skill Attainment measure.

Work-based Learning

Work-based Learning measures the percentage of career-technical education concentrators who were graduates in the graduation cohort and participated in a minimum of 250 hours of work-based learning.

Post-Program Placement

Post-Program Placement measures the percentage of status known CTE Concentrators who left Secondary Education the previous year and were enrolled in postsecondary education or advanced training, in military service, a service program, an apprenticeship or employed. If the status known is less than 85%, the pathway receives a demotion for this measure. If the status known is 95% or more, the pathway receives a promotion for the Post-Program Placement measure.

Below is a table showing the Quality Program Review performance indicator components, thresholds and student groups represented in each data set.
