If Change 24-71 is deleted for FY24.

What will happen for students that have not graduated and have W SNR records?

Can those records still be reported?

Hi EMIS Public Comment Team,

I'm emailing today with a concern about change 24-71 Updates SNR reporting for EOC tests.

It says that we will no longer be able to report scores W and 2.

My question/concern about removing score not reported code W is that in the graduation collection the COVID substitute GEtest record in our SIS will be fatal errors.

My question/concern about removing score not reported code 2 is that we will not be able to report the IOWA or Terra Nova test scores for students transferring into our district with IOWA or Terra Nova Scores that are going to allow them to meet competency or readiness. Here is the [link to the ODE page](#) on how to use IOWA and Terra Nova test scores with the conversion charts of how public school districts can convert IOWA and Terra Nova scores into EOC exam scores.

Good afternoon,

I have heard the reasoning for removing these codes is due to students being out of the 5 year rate. As of the technical documents for the DPR report cards from last school year, 18 points is still an option for our students to be counted in the numerator of the 12th grade passage measure. In FY24, it would be the classes of 2020-2022 that could use the 18 point option. They could also score a 3 with a substitution for proficiency on Algebra 1 and ELA2 and be included in that measure if they were the class of 21 and up. If the DPR report cards do not change in Ohio law, we would be using the W and 2 score not reported options for that measure up through the 26/27 school year or even 27/28 if it was an 8th grader in 19/20 that got a score substitution.
