EMIS Change 25-69

This change updates EMIS Manual Section 2.8 to include that industry credentials can be reported in the Initial Exiting Student (S) Follow-Up Collection. See change 24-38 for this change in reporting. The FY25 change is simply updating the EMIS Manual.

SECTION 2.8: STUDENT ASSESSMENT (FA) RECORD

Standard Assessments

Industry Credential (Industry Cred; GW). An industry credential is a credential, certification, or license developed and awarded by an industry association or state licensing agency. Students are not required to get an industry credential, but if a student does attempt one of the industry credentials listed in Section 2.8.1 of the EMIS Manual, the district should report the credential to EMIS. If a student attempts multiple Industry Credentials, then a separate FA Record should be reported for each credential.

If a student attempts an industry credential during the school year, the district in which the student is enrolled should report the attempt during the earliest appropriate assessment collection. If a graduating student attempts an industry credential after graduation and prior to the close of the Graduation (G) Collection, the graduating district should report the industry credential during G reporting.

Traditional districts, STEM districts, JVSDs, community schools, and state organizations are able to report Industry Credentials.

Industry credential results are reported in the Career Tech Accountability Assessment (A) Collection, the Other Accountability Assessments (A) Collection, ~~and~~ the Graduation (G) Collection, and the Initial Exiting Student (S) Follow-Up Collection.
