Adjectives to Describe

1.

2.

3.

Purpose of Professional Development

“Professional development programs are systematic efforts to bring about change in the classroom practices of teachers, in their attitudes and beliefs and in the learning outcomes of students.”

Guskey, 2002, p. 1

Must Consider

What motivates teachers to engage in professional development.

The process by which change in teachers typically occurs.

Motivation

Become better teachers (improving student outcomes)

Increased competence

Greater professional satisfaction

Process of Change

Common Belief of PD and Change

Recent Research Findings of PD and Change

Professional Development

Recognize that change is a gradual and difficult process for teachers.

Professional Development

2

Ensure that teachers receive regular feedback on student learning progress.

Professional Development

Provide continued follow-up, support and pressure.

Professional Development and Teacher Change, Thomas R. Guskey, 2002

Two Resources

Ohio Standards
for Professional
Development

Every Student
Succeeds Act
(ESSA)

Ohio Standards for PD

Guidelines for creating a **system** of effective professional learning

Set of clear expectations for professional learning

Standards to guide efforts in:

- Selecting and evaluating professional learning opportunities
- Establishing policies for professional learning opportunities

Intended Audience

- Individual educators
- Principals
- School and district leaders
- Higher education
- External vendors
- Local professional development committees

Ohio Standards for Professional Development

Includes seven standards:

- Standard 1: Learning Communities
- Standard 2: Leadership
- Standard 3: Resources
- Standard 4: Data
- Standard 5: Learning Designs
- Standard 6: Implementation
- Standard 7: Outcomes

Know Ohio's Standards

ESSA

Federal definition

Most prescriptive ever in history

Six specific criteria

How does ESSA define professional development?

(B) are sustained (not stand-alone, 1-day, or short term workshops), intensive, collaborative, job-embedded, data-driven, and classroom focused.

ESSA Criteria

Sustained

Intensive

Collaborative

Job-
Embedded

Data-Driven

Classroom-
Focused

Bridging the Gap

Paving the Pathway from Current Practice to
Exemplary Professional Learning

Frontline Research and Learning Institute

https://www.frontlineeducation.com/Frontline_Research_Learning_Institute/Reports/ESSA_Report

(Google: Bridging the Gap Frontline)

The majority of professional development falls short of the ESSA definition.

**How does your current
practice align to the new
definitions?**

Sustained:

Taking place over an extended period; longer than one day or a one-time workshop

Figure 2:
Incidence of One-Time Professional Development

80% of professional development activity enrollments over five years were not sustained.

13% of activities included more than three meetings.

Sustained

Mode	Expert to Group	Expert to Individual	Peer to Peer
Definition	Content is designed to be delivered to educators together based upon core concepts or shared needs.	Content is designed to be delivered to individual educators based upon demonstrated need.	Content is based upon observation of or engagement in dialogue with others in similar positions.
Examples	<ul style="list-style-type: none">• Workshops• Classes (on-line or in person)• Lectures	<ul style="list-style-type: none">• Coaching• Mentoring• Demonstration	<ul style="list-style-type: none">• Professional learning communities• Co-observation

Sustained Metric

Expert to Group	Expert to Individual	Peer to Peer
<ul style="list-style-type: none">• Number of meetings for a course• Count of times an individual educator participates during a school year	<ul style="list-style-type: none">• Number of times principal or other instructional leaders meets with teacher• Duration of meeting period	<ul style="list-style-type: none">• Periodicity of PLC meetings• Number of peer observations• Number of content-driven meetings between teachers

How many times is enough?

3 or fewer \neq sustained

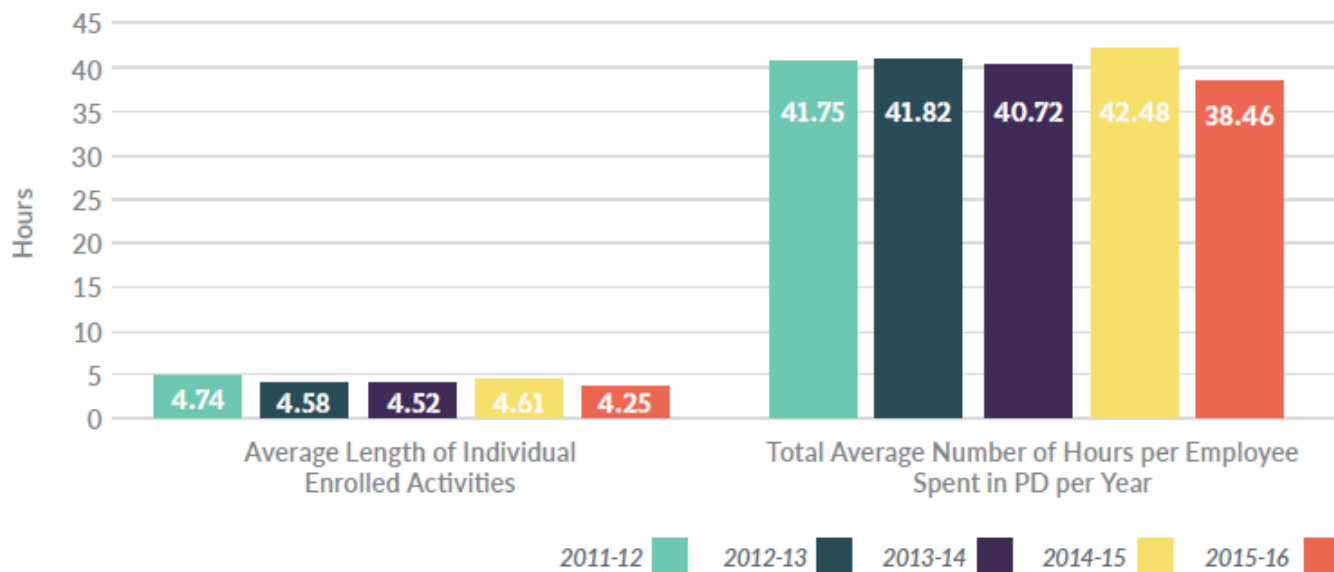

4, 5 or 12 times $=$ contextual

Based on district, school, skill, need, etc.

Intensive:

Focused on a discreet concept, practice or program

Average Length of Enrolled Activities and Average Number of Hours Employees Participate in PD per Year

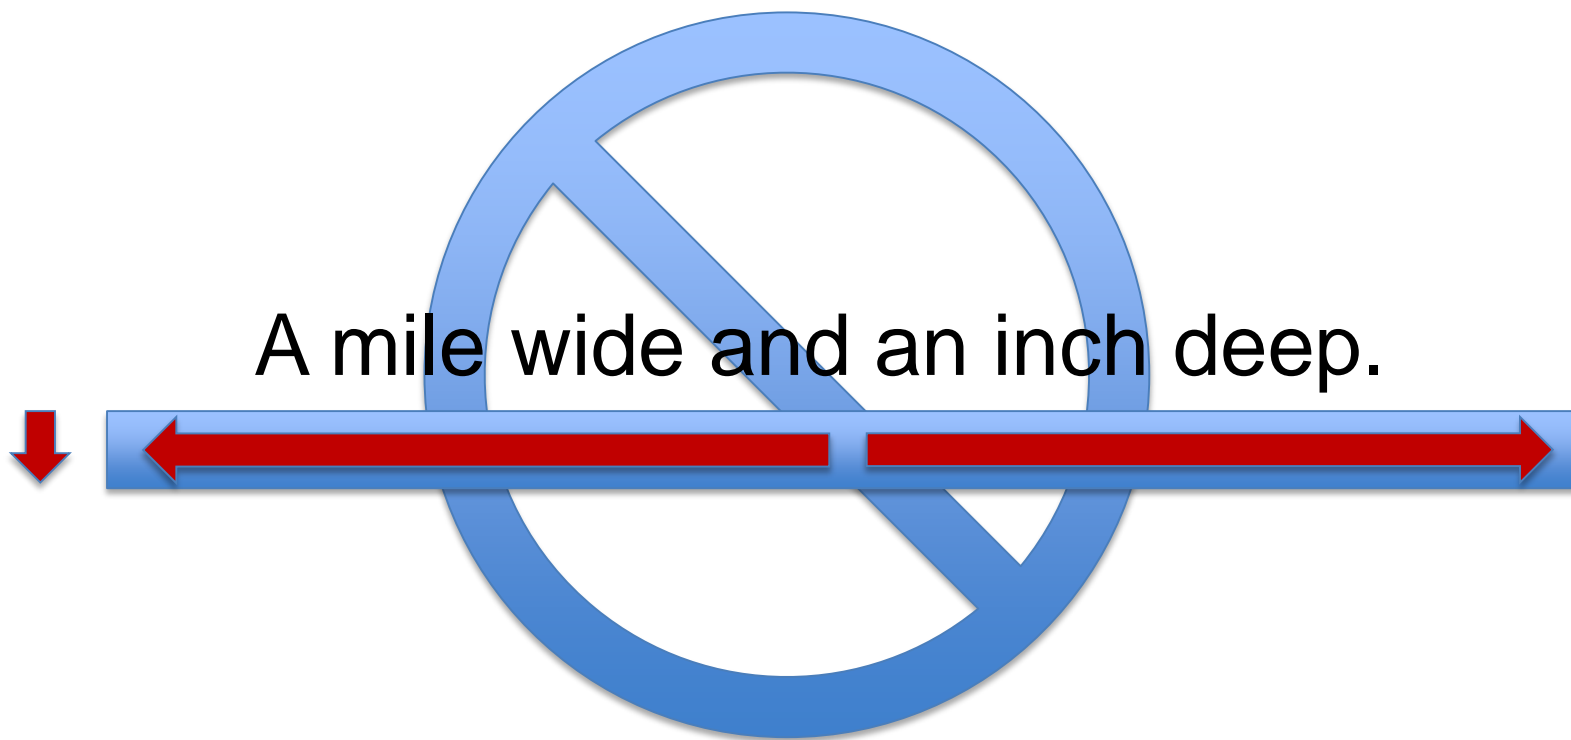

The average PL activity was 4.5 hours.

The average total amount of time teaching professionals spent in PL each year was 41 hours.

Key Concept for Intensive

A mile wide and an inch deep.

Effective Professional Development

INCH WIDE

MILE DEEP

Intensive Metric

Expert to Group	Expert to Individual	Peer to Peer
<ul style="list-style-type: none">• Length in hours of course meeting• Total amount of time in hours spent on one topic or standard	<ul style="list-style-type: none">• Length of observations of teaching focused on one competency• Total amount of coaching time focused on one competency	<ul style="list-style-type: none">• Total amount of time spend on one area• Length of peer coaching sessions focused on one topic or standard in hours• Length in hours of observations and associated debriefings

How much time is enough?

49 hours devoted exclusively to a topic as the minimum requirement for developing competency

Current findings:

4.25 hours

Take Away: Fewer than 14 hours does not yield significant results for student outcomes.

(Yoon et. al., 2007)

Understood Challenges

There may not be adequate time to go deeply on anything.

There is an enormous gap between how much time is needed and how much time is presently spent on PD.

Pitt County Schools: An Exemplar

Goal: Increase time spent on learning key competencies to improve instruction

School Year	National Average	Pitt County
2011-2012	4.74	10.11
2012-2013	4.58	8.49
2013-2014	4.52	9.35
2014-2015	4.61	13.67
2015-2016	4.25	11.98

Collaborative:

involving multiple educators, educators and coaches or set of participants grappling with the same concept or practice and in which participants work together to achieve shared understanding

Percent of Activity Enrollments by Activity Format

9% of activity enrollments were in formats that inherently include collaborative learning designs

Questions for PD Planning

Shared Understanding

What is the learning objective?

What will participants know and be able to do as a result of the learning?

How does it relate to other professional competencies that educators have or are building?

How will we know if professional learning improves student learning?

Questions for PD Planning

Working Together

What kind of learning process leads to the learning outcome?

How should people engage with one another to advance the learning process?

What struggles might be required to advance understanding?

How will feedback loops and other communication cycles inform learning?

How will the group identify shared blind spots and address them?

Questions for Planning

People

Who are the participants that need to learn (are they appropriately matched together or divided by prior knowledge)?

What background knowledge, skills and experience is required to advance learning?

What relational dynamics will facilitate working together?

Who is able to participate and when?

Reciprocity

Key Ingredient of Collaborative PD

Members share both teaching and learning.

Mutual Exchange

Ways to Achieve Collaboration

Workshop

Typical Challenge	Example Improvements
Expert-to-novice instruction Short duration Content not specific to context Single product or skill outcome Not personalized	Expert-educator reciprocity Continued meetings and ongoing follow up Prioritized learning based on context Multiple competency-based outcomes Group-led objective setting and learning

Ways to Achieve Collaboration

Internal Meeting or Committee Work

Typical Challenge	Example Improvements
<p>Work conducted independently</p> <p>Focused on logistics or implementation</p> <p>Problem-solving</p>	<p>Expert-educator reciprocity</p> <p>Continued meetings and ongoing follow up</p> <p>Prioritized learning based on context</p> <p>Multiple competency-based outcomes</p> <p>Group-led objective setting and learning</p>

Ways to Achieve Collaboration

Graduate Coursework

Typical Challenge

- Taken independently
- Removed from instructional context
- Emphasize content knowledge
- Based on availability

Example Improvements

- Include colleagues or create a shared learning group
- Select coursework or instructor based upon identified competency need; request instructor reciprocal engagement on competency development
- Focus on sharing relevant content with colleagues
- Enroll when needed or as part of a shared knowledge-gathering process

Teaching Channel Video

<https://www.teachingchannel.org/videos/build-collaborate-learning-culture#>

Job-embedded:

a part of the ongoing, regular work of instruction and related to teaching and learning taking place in real time in the teaching and learning environment

Activities Offered and Enrollments within the School System

37% of all activities were offered by third parties rather than by the participants' school system

Sample Rubric for Evaluating Job-Embeddedness

Activity	Regular and on-going	Related to current instruction	Applicable to current teaching or coaching	Integrated into teaching and learning environment	Overall job-embeddedness
Lesson-study	Maybe	Yes	Yes	Yes	High
Independent action research	No	Yes	Maybe	Maybe	Moderate
Classroom management workshop	No	Maybe	Yes	No	Low/ Moderate
Graduate class on school law	Yes	No	No	No	Low

Frontline Research and Learning Institute: Bridging the Gap Series

Whereas coursework and conference attendance may strengthen background knowledge, expand awareness of new research and practice, and facilitate valuable professional connections,
**they are typically
disconnected from daily practice.**

Data-Driven

Alignment to data-driven PD Activity Formats

8% of activities met criteria for data-driven

Less than 5% of activities included a focus on using data or assessments

Available Data Source	Professional Learning Opportunity
Summative assessments of students' knowledge and skills	Focus on learning or practice in areas where many students are consistently low-performing
Observations of teacher practice	Focus on learning or practice in areas where many educators struggle to convey content or keep students on track
Progress toward student learning goals (Student Learning Objectives, Student Learning Goals, etc.)	Focus on learning or practice in areas where many teachers struggle to set meaningful goals, gather actionable data or are off-track to meet goals
Surveys of educators, evaluators, students, parents	Focus on learning or practice in areas where educators or others identify a gap between actual practice and ideal practice
Outcomes notes from professional learning communities	Focus on learning or practice that addresses consistent challenges facing many educators in their regular learning practices

Data-Driven: Essential Questions

1. To what extent are professional learning activities that teachers are participating in selected based on rationale that includes data on **their own** and **their students' needs**.

2. To what extent is the data **being used** to select professional learning related to daily teaching activities and/or specific student learning outcomes?

Classroom Focused:

related to the practices taking place during the teaching process and relevant to instructional process

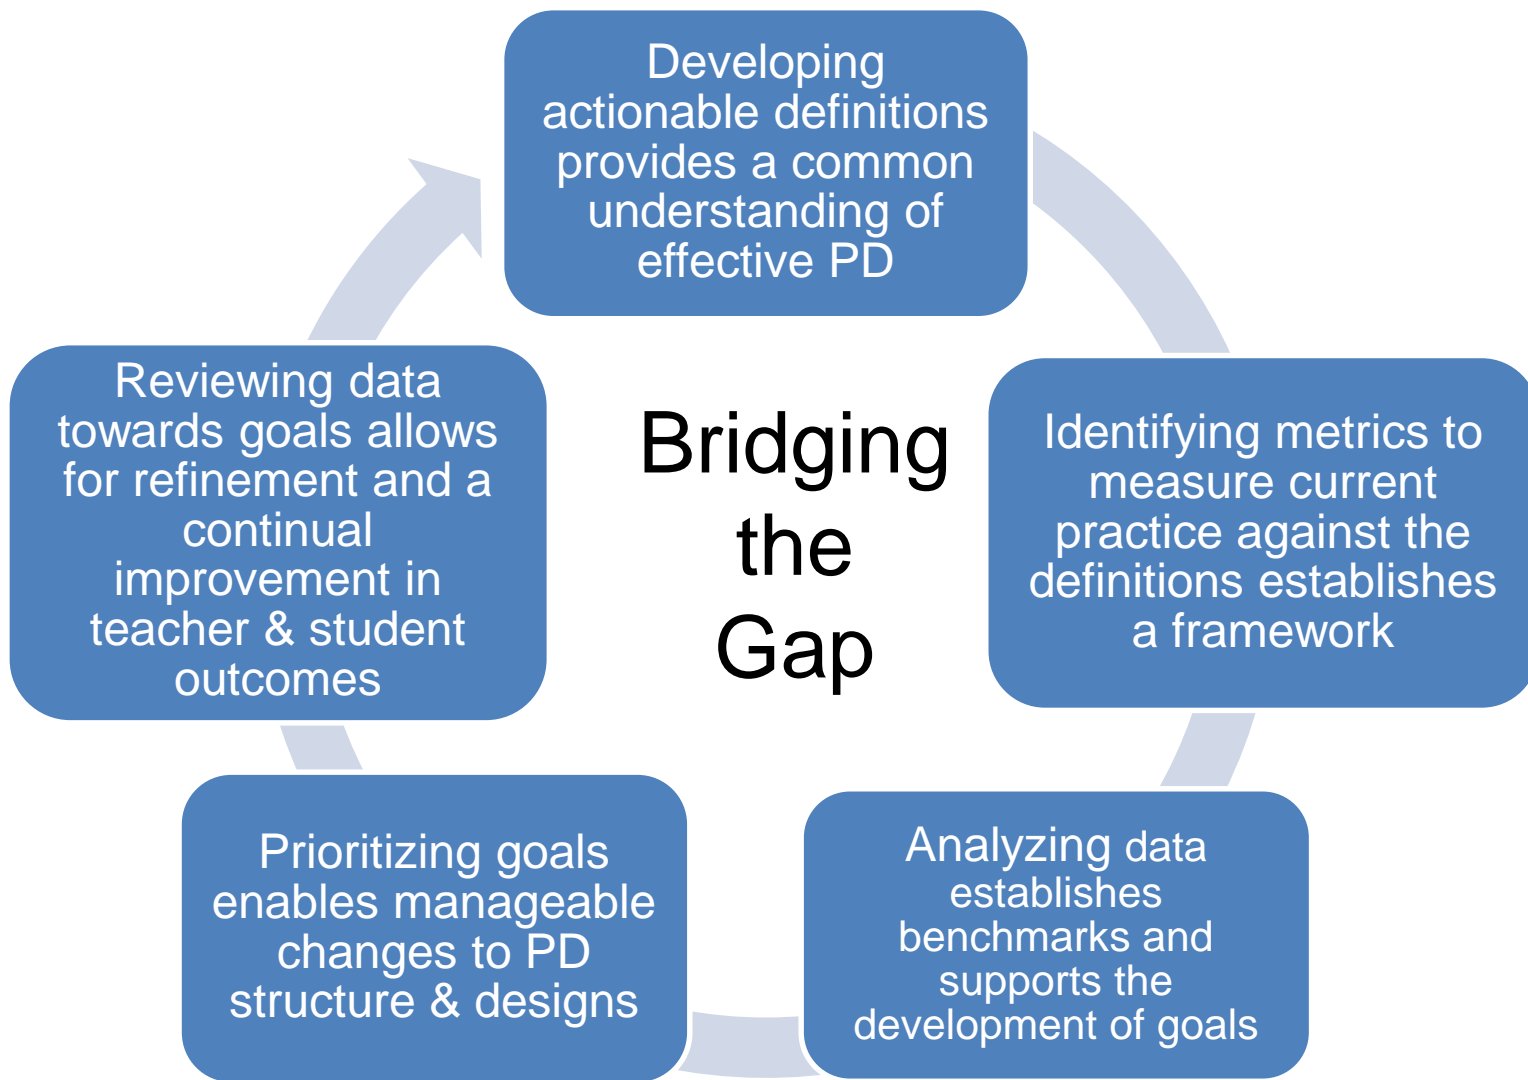

Classroom Focused

Strongest criterion

85% of enrollments aligned to at least one teaching standard (InTASC)

Implications

Dual Role of Principal

Principal as a
Learning Facilitator

Principal as Evaluator

The Dual Role of Principal

	Principal as Learning Facilitator	Principal as Evaluator
Sustained	Facilitate a common understanding regarding key priorities, and provide for the time, on an ongoing basis, to enable teachers to develop a deep learning around those priorities	Encourage ongoing reflections regarding priorities, and how the teachers learning is deepening over time
Intensive		Review lessons from targeted priorities and connect those learnings to changes in practice and measured student impact
Collaborative	Foster a safe environment and facilitate constructive growth-oriented feedback during all collaborative learning opportunities (including evaluation conversations)	
Job embedded	Provide opportunities for peer-visits or coaching	Use evaluation / observation conferences for feedback & dialogue: <ul style="list-style-type: none"> • Discuss with a teacher their use of individual student data in the planning and execution of lessons • Identify, based on observations, specific instructional practices to be refined • Identify PL opportunities for teachers based on their specific evaluation results
Classroom focused	Develop a common understanding regarding the meaning & quality indicators of teaching standards	
Data driven	<ul style="list-style-type: none"> • Use data to identify professional learning priorities at the building level • Facilitate or support PLCs where teachers collaboratively use data to improve instruction

PD Description	Begin/End Dates	Sustained	Intensive	Collaborative	Job-Embedded	Data-Driven	Classroom Focused
1.							
2.							
3.							
Resources Required	Evaluation of Effectiveness						
1.	1.						
2.	2.						

Provide a brief description of how the overall plan for professional development meets the six criteria as delineated by ESSA for high-quality professional learning.

Sustained: taking place over an extended period; longer than one day or a one-time workshop

Intensive: focused on a discrete concept, practice or program

Collaborative: involving multiple educators, educators and coaches or set of participants grappling with the same concept or practice and in which participants work together to achieve shared understanding

Job-Embedded: a part of the ongoing, regular work of instruction and related to teaching and learning taking place in real time in the teaching and learning environment

Data-Driven: based upon and responsive to real time information about the needs of participants and their students

Classroom-Focused: related to the practices taking place during the teaching process and relevant to instructional process

Professional Development Audit

1-4	Criteria	Evidence
	Sustained	
	Intensive	
	Collaborative	
	Job-Embedded	
	Data-Driven	
	Classroom-Focused	

4= Exactly aligned
3= Somewhat aligned
2= Barely aligned
1= Not aligned

Criterion Definitions:

Sustained: Taking place over an extended period; longer than one day or a one-time workshop

Intensive: focused on a discreet concept, practice or program

Collaborative: involving multiple educators, educators and coaches or set of participants grappling with the same concept or practice and in which participants work together to achieve shared understanding

Job-embedded: a part of the ongoing, regular work of instruction and related to teaching and learning taking place in real time in the teaching and learning environment

Data-driven: based upon and responsive to real time information about the needs of participants and their students

Classroom-focused: related to the practices taking place during the teaching process and relevant to instructional process

Next Steps

- Review the report series for additional tips.
- Develop an action plan for professional learning with a focus on measurable outcomes
- Reach out and ask for help!

School Leaders

- Rethink professional development.
- Use data to gain insights into progress.
